Zoonotic Disease: Bioterrorism and Beyond

*Multi-media training with video,
case study and informational slides*

Continuing education credits

FREE training and credits

Description: *This online training course will introduce zoonotic disease basics to non-veterinarians, and explore zoonotic diseases as potential bioterrorism agents with emphasis on the Category A zoonotic agents. The topics of food security and agroterrorism are examined and the framework for disease surveillance is presented. A case study explains the steps of zoonotic disease outbreak investigations and details the role of environmental health professionals. No pre-requisites.*

Presenters: *Melinda Wilkins, DVM, MPH, lead faculty for this training course and Director, Division of Communicable Disease at the Michigan Department of Community Health; Nancy Frank, DVM, MPH is Assistant State Veterinarian with the Michigan Department of Agriculture; Christine Petersen, DVM, PhD is Assistant Professor in the Department of Veterinary Pathology and staff at the Center for Food Security and Public Health (CFSPH) at the College of Veterinary Medicine, Iowa State University; John Tilden, DVM, MPH is Manager of the Food Safety Planning and Response Unit at the Michigan Department of Agriculture.*
