### Evidence-Based Public Health Bibliography

#### Articles

Books

Internet Resources

A database of evidence-based clinical practice guidelines and related documents submitted by various agencies and organizations. Included guidelines must be based on evidence from the peer-reviewed journal literature, not more than 5 years old, and include recommendations, strategies, or information that assists physicians and/or other health care practitioners and patients in making decisions.

Canadian Institutes of Health Research. Health-evidence.ca http://health-evidence.ca/
Purpose is to “identify, appraise, and make available recently completed, methodologically-sound reviews of health promotion and public health interventions published from 1985 to the present”.

Abstracts of reviews are searchable, browsable and viewable for free. Access to full-text of reviews requires a subscription.

A subset of the Cochrane Database of Systematic Reviews which includes reviews on public health topics.

A searchable storehouse of documents containing CDC recommendations on a variety of health, prevention, and public health practice issues.

Lamar Soutter Library. University of Massachusetts Medical School. Evidence-Based Resources for Public Health Practice Available for Free Online Access http://library.umassmed.edu/ebpph/ebresources.cfm

Citations and author abstracts from more than 4,800 biomedical journals published in the United States and 70 other countries. The database contains over 12 million citations dating back to the mid-1960's. Coverage is worldwide, but most records are from English-language sources or have English abstracts.
